

## Technical Bulletin 24-002

**Date:** February 2, 2024

**Regarding:** Oil to Fuel Ratio

**Directive:** Effective immediately, the required oil to fuel ratio for all ROK Cup USA classes is one (1) Liter of oil for five (5) gallons of fuel. This is also approximately 6.76 fluid ounces of oil to one (1) gallon of fuel.

**Rule Change:**

1.7.2 Fuel/oil is the ONLY combination allowed. **The spec ratio is one (1) Liter of oil for five (5) gallons of fuel for all classes.**

1.7.9 Any driver, mechanic, and/or team principal caught using a fuel additive will receive an automatic one-year ban from all ROK Cup USA events. **The proven use of any additive containing a known carcinogen can result in up to a *lifetime ban* from ROK Cup USA events and other series/sanctioning organizations who reciprocate/honor ROK Cup USA's findings.**

**Signed:** 

**Print:** Michael Burrell, ROK Cup USA Director
